The image displays two maps of the Pinar del Río region in Cuba, showing land use and infrastructure. The left map is a detailed topographic map with a grid overlay, showing the coastline, major roads, and various land use zones. The right map is a simplified version of the same area, focusing on the urban layout and major infrastructure.

The image displays two maps of the Pinar del Río region in Cuba, illustrating land use and infrastructure. The left map is a detailed topographic map with various colored zones (orange, green, blue, yellow) and a grid overlay. The right map is a simplified version of the same area, focusing on the urban layout and major roads.

The image displays two maps of the Pinar del Río region in Cuba, illustrating land use and infrastructure. The left map is a detailed topographic map, while the right map is a simplified version focusing on the urban layout.

Left Map (Detailed Topographic Map):

- Geographic Features:** The map shows a large, irregularly shaped area with a grid overlay. The area is divided into several colored zones: a large orange area on the left, a green area in the center, and a blue area on the right. A yellow area is visible in the upper right corner.
- Infrastructure:** A network of roads is shown, including a major road labeled "Carretera Nacional" and several smaller roads. A river or stream is also depicted.
- Grid:** A grid of coordinates is overlaid on the map, with labels ranging from E=23.500 to E=24.500 and N=15.000 to N=16.000.

Right Map (Simplified Urban Map):

- Geographic Features:** This map shows a simplified version of the same area, focusing on the urban layout. It includes a grid overlay and a network of roads.
- Infrastructure:** The map highlights the urban layout, showing a central area with a high density of buildings and roads. The surrounding areas are less detailed.
- Grid:** A grid of coordinates is overlaid on the map, with labels ranging from E=23.500 to E=24.500 and N=15.000 to N=16.000.
